

Dear FCC,

Please do not accept the petition to deregulate the DSL phone companies such as BellSouth. I use a small ISP in Sanoma Valley called Sonic.net. They use SBC's DSLAM equipment and if the petition were to go through, could affect my service with my ISP. The smaller ISP's provide much better customer and technical support than the big-bells do. Please don't take away my right to choose a different DSL ISP. Deregulation will only result in these ISP's going out of business for good and will result in no consumer choice.
